

DIGITAL SOLUTIONS FOR RELIABLE ENDPOINTS

Researchers today are working to improve quality of life for IBD patients with treatments that make the chronic, life-long condition more manageable. Clinical trials that accurately collect patient-reported outcomes and calculate symptom scores contribute to this effort.

ENHANCE PRIMARY ENDPOINTS

Signant's IBD diary collects patient-reported outcomes through an easy-to-use, electronic format to encourage daily completion and improve data quality.

GAIN EXPERT GUIDANCE

Signant's scientific and clinical experts will help you navigate common study challenges, such as identifying key data points and ensuring that complex scores are calculated correctly.

CALCULATE ACCURATE SCORES

Signant's eCOA solution can complete the required scoring calculations, eliminating the risk of manual errors and the need for another integrated system.

IMPROVE PATIENT ENGAGEMENT

Patient Concierge promotes communication between the site and patient, which can make patients feel more involved in the overall process.

MAKE PARTICIPATION EASIER

Virtually recreating the clinic experience, our Telemedicine reduces the number of in-person visits needed and offers flexibility to complete study assessments.

DIGITALIZE THE ENTIRE STUDY

All the SmartSignals solutions can be used as standalone tools or integrated with one another to further enhance the accuracy and efficiency of your IBD study.

At Signant, our SmartSignals solutions will help you develop treatments that improve the quality of life for IBD patients everywhere.
