

CLINICAL DEVELOPMENT SOLUTIONS TO IMPROVE ACNE RESEARCH

Acne is the second most common skin condition, affecting an estimated 650 million people in the world. Due to the subjective nature of the most commonly used clinical assessments, capturing reliable primary endpoints in acne studies can be challenging.

Signant Health's proven solutions generate the high-quality evidence your acne study needs to be successful.

STANDARDIZE ACNE ASSESSMENTS

Our targeted rater training standardizes clinician-reported outcome (ClinRO) scales and improves assessment techniques. Designed and implemented by experienced clinician raters, Signant's Rater Training and Qualification prevents inter- and intra-rater variability from impacting your signal detection.

KEEP PATIENTS ENGAGED

Signant's engagement solution, Patient Concierge, lives conveniently on the same platform as our eCOA solution. This digital tool not only provides patients with visit schedules and study information, but it allows sites to send SMS reminders to drive patient compliance.

ENABLE REMOTE PARTICIPATION

Implement our Telemedicine solution to replace acne consultations that do not require in-person lesion counting with convenient videoconferencing. The secure and compliant platform accommodates multi-person meetings, allowing parents to be present for younger participants.

CAPTURE ACCURATE DATA

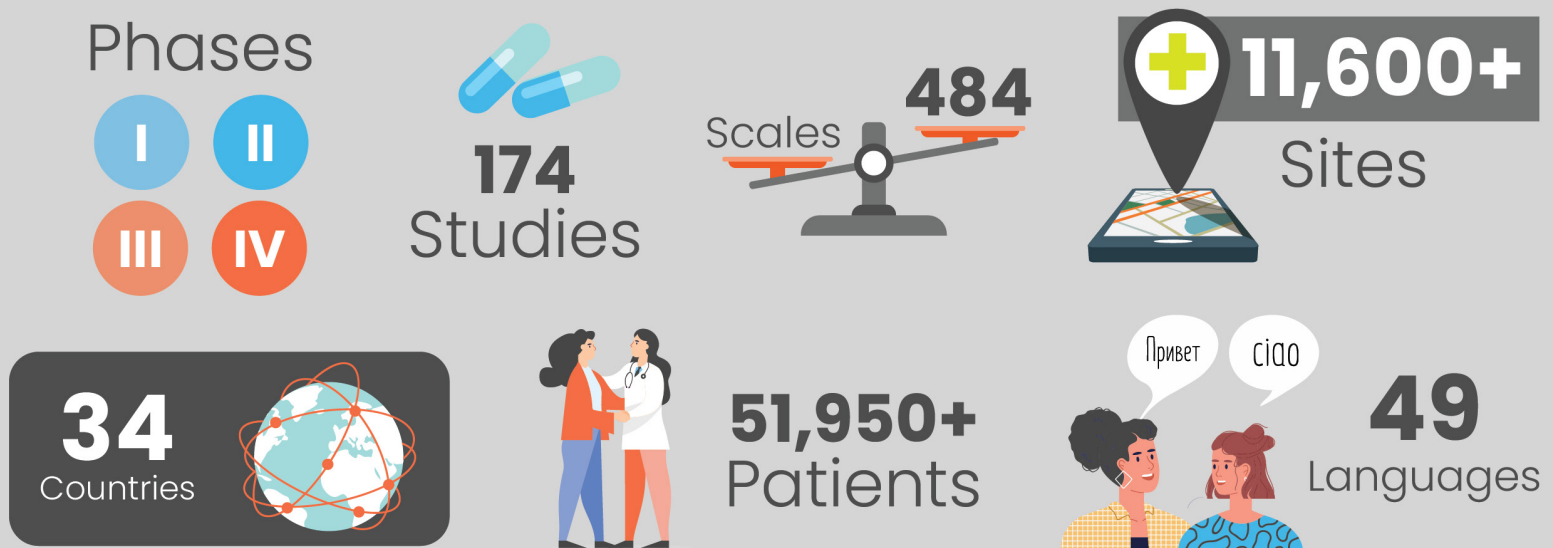

Accessible via a convenient app, Signant's eCOA solution features a comprehensive library of ready-to-go assessments, such as the Acne-QoL and DLQI. Your team will have real-time access to data related to the patients' symptoms, satisfaction with the treatment, as well as the treatment's effect on their quality of life.

IMPROVE ENDPOINT RELIABILITY

Our centralized statistical monitoring of blinded data identifies outliers, patterns, inconsistencies, trends, and potential fraud so you can make the necessary adjustments. Led by experienced data experts and clinicians, our Blinded Data Analytics solution provides actionable insights to reduce noise for signal detection.

At Signant, our focus is helping you develop and deliver treatments or therapies faster in order to improve the quality of life for dermatology patients everywhere.

SIGNANT'S DERMATOLOGY CLINICAL TRIAL EXPERIENCE

SMARTSIGNALS SOLUTIONS

The SmartSignals solutions can be used individually or integrated together for a seamless, end-to-end digital experience.
