

Signant SmartSignals Integration: Adding RTSM to eCOA

Using Signant SmartSignals RTSM alongside our eCOA solution simplifies workflow for sites and eliminates unnecessary data reconciliation between systems. It also provides simplified working for the sponsor / CRO study team by streamlining operational processes, putting you in greater control of your clinical trial.

eCOA Manager

eCOA Web or App

HOW IT WORKS

- When a patient is first screened in RTSM, this automatically generates a patient record in our eCOA solution – eliminating duplication of effort for the study site.
- When eCOA data are collected for eligibility assessment, these are provided in real-time to RTSM to ensure that patients are not randomized to treatment until eligibility criteria are met. This reduces the risk of protocol deviations.

INTEGRATION BENEFITS

- Streamlines workflow by eliminating duplicate activities in multiple systems
- Reduces unnecessary data reconciliation activity and associated DCF requests
- Limits the potential of protocol deviations when inclusion criteria include run-in eCOA data

SIGNANT'S INTEGRATED SOLUTIONS INCLUDE

- A single project management point of contact, simplifying study team activity
- A single helpdesk for sites, patients and sponsors/CROs
- A single contracting entity

SIGNANT SMARTSIGNALS RTSM

SOLUTION

Built from over 20 years of experience, SmartSignals RTSM is flexible enough to accommodate any unique protocol elements—such as complex dose titration, basket trials, or advanced cohort management—and is fully supported by Signant's in-house, expert biostats team

SCIENCE

In-house biostatistics team with industry-leading experience, guaranteeing 100% integrity in randomization while providing consulting for clients on the best randomization methodology

SCALE

Currently supporting 500+ studies globally for small, medium, and big pharmaceutical companies, as well as biotechs and CROs

SERVICE

Quickly align resources and assign study team for faster startups and efficiently run studies from start to finish with a single project manager for eCOA and RTSM
